HANDS ON WITH REACT NATIVE

– LIVECODING SESSION

Sebastian Germesin

CEO @ AppWithUs

HANDS ON WITH REACT NATIVE – LIVECODING SESSION

WHAT WILL I PRESENT?

- ▶ How to build a (small) **ReactNative** App from scratch.
 - ▶ *"Show upcoming JS Meetups around me"*
- ▶ I have **only 7 slides!** So there will actually be **code** 🧐

HANDS ON WITH REACT NATIVE – LIVECODING SESSION

BEFORE WE START

- ▶ Install Homebrew, nodeJS and watchman
- ▶ Install ReactNative CLI
- ▶ (Install XCode, Android Studio)

This is stuff that I won't show today 😬

```
# install homebrew
/usr/bin/ruby -e "$(curl -fsSL
https://raw.githubusercontent.com/
Homebrew/install/master/install)"

# install NodeJS and Watchman
brew install node watchman

# install ReactNative CLI
brew install -g react-native-cli

# install XCode
...

# install Android Studio
...
```

HANDS ON WITH REACT NATIVE – LIVECODING SESSION

GO TO YOUR CONSOLE

```
[14:33:10] (sgermesin@Calvin)
~/repo/rnmeetup (0 files, 0b) > react-native init RNMeetup
```

HANDS ON WITH REACT NATIVE – LIVECODING SESSION

WHAT DID WE LEARN?

- ▶ How to build an App in 30 minutes with RN from scratch
- ▶ There is something called "[react-native link](#)" to link native libraries automatically into the app.
- ▶ The Meetup API is great
- ▶ The [Maps](#) component by AirBnb is great
- ▶ There is a huge community
